# **1. INTRODUCTION**

Computer plays an important role in our daily life. Anything we want we can get only in one mouse click. Speed, reliability and accuracy of the computer make it a powerful tool for different purposes. A very important and basic need of today's modern business world is the quick availability and processing of information using computer. One can easily get the type of required information within a fraction of a second. The project that I have taken is also in this category which is used in our daily life whenever we want to purchase some items we can easily get them at our home.

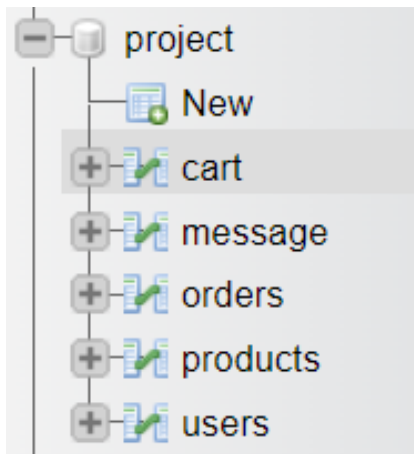

## **1.1. OBJECTIVE**

The objective of project on Online Shopping Portal is to developing a GUI based automated system, which will cover all the information Related to the all Clothes products. So by this GUI based automated system a user want to purchase something then it only a mouse click away to purchase these products.

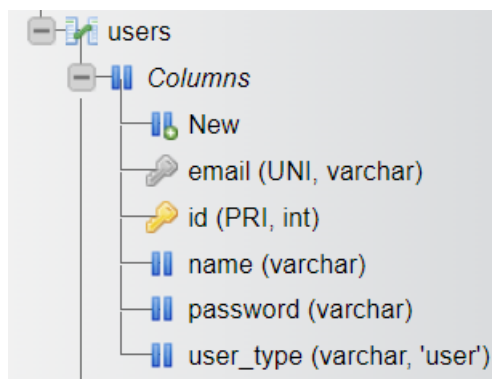

## **1.2. NEED OF ONLINE SHOPPING PORTAL**

The ONLINE SHOPPING PORTAL is developed according the current need in different Fields. This is Online Shopping Website which provides facility for purchasing Clothes of different brands and many more items. So by using this Online Shopping Portal users which want to purchase some products will first Register an account on this portal, then Login through their Username and Password, and then Select items which they want to purchase and add them to cart and finally checkout by giving payment details. So by using this portal users can easily purchase products from their home.
